

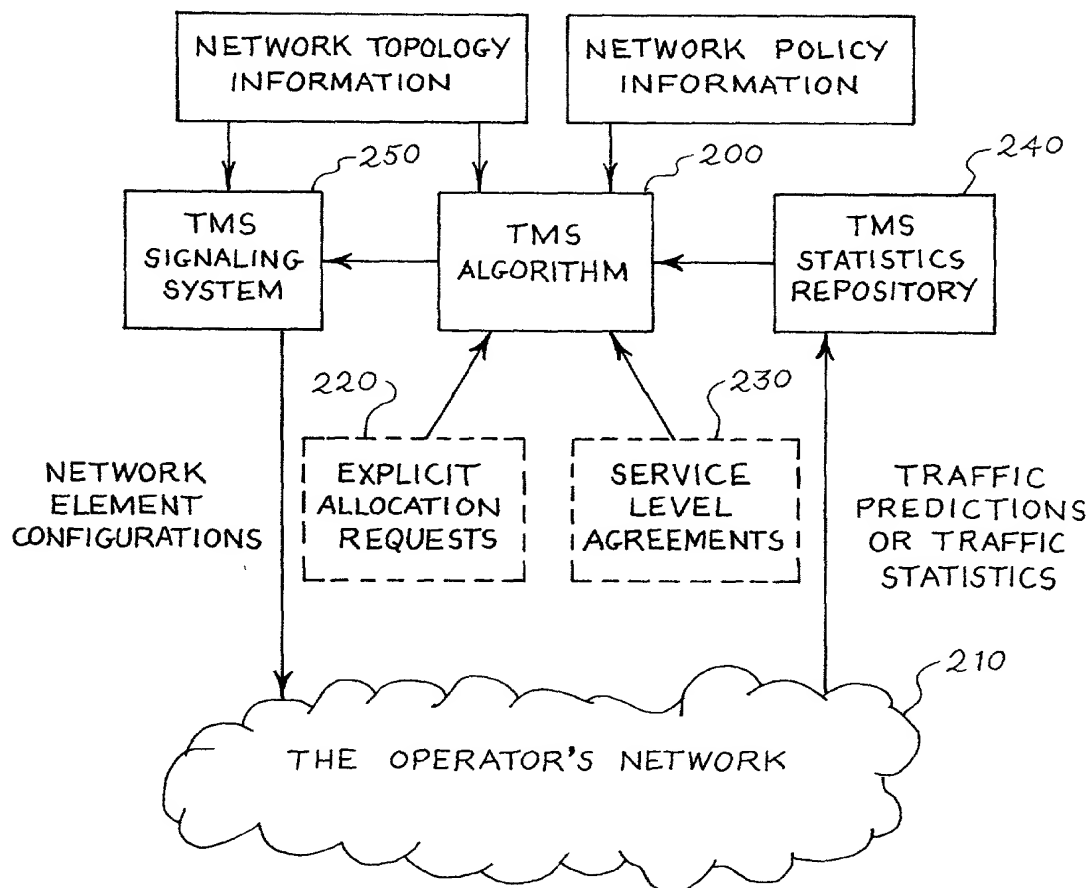

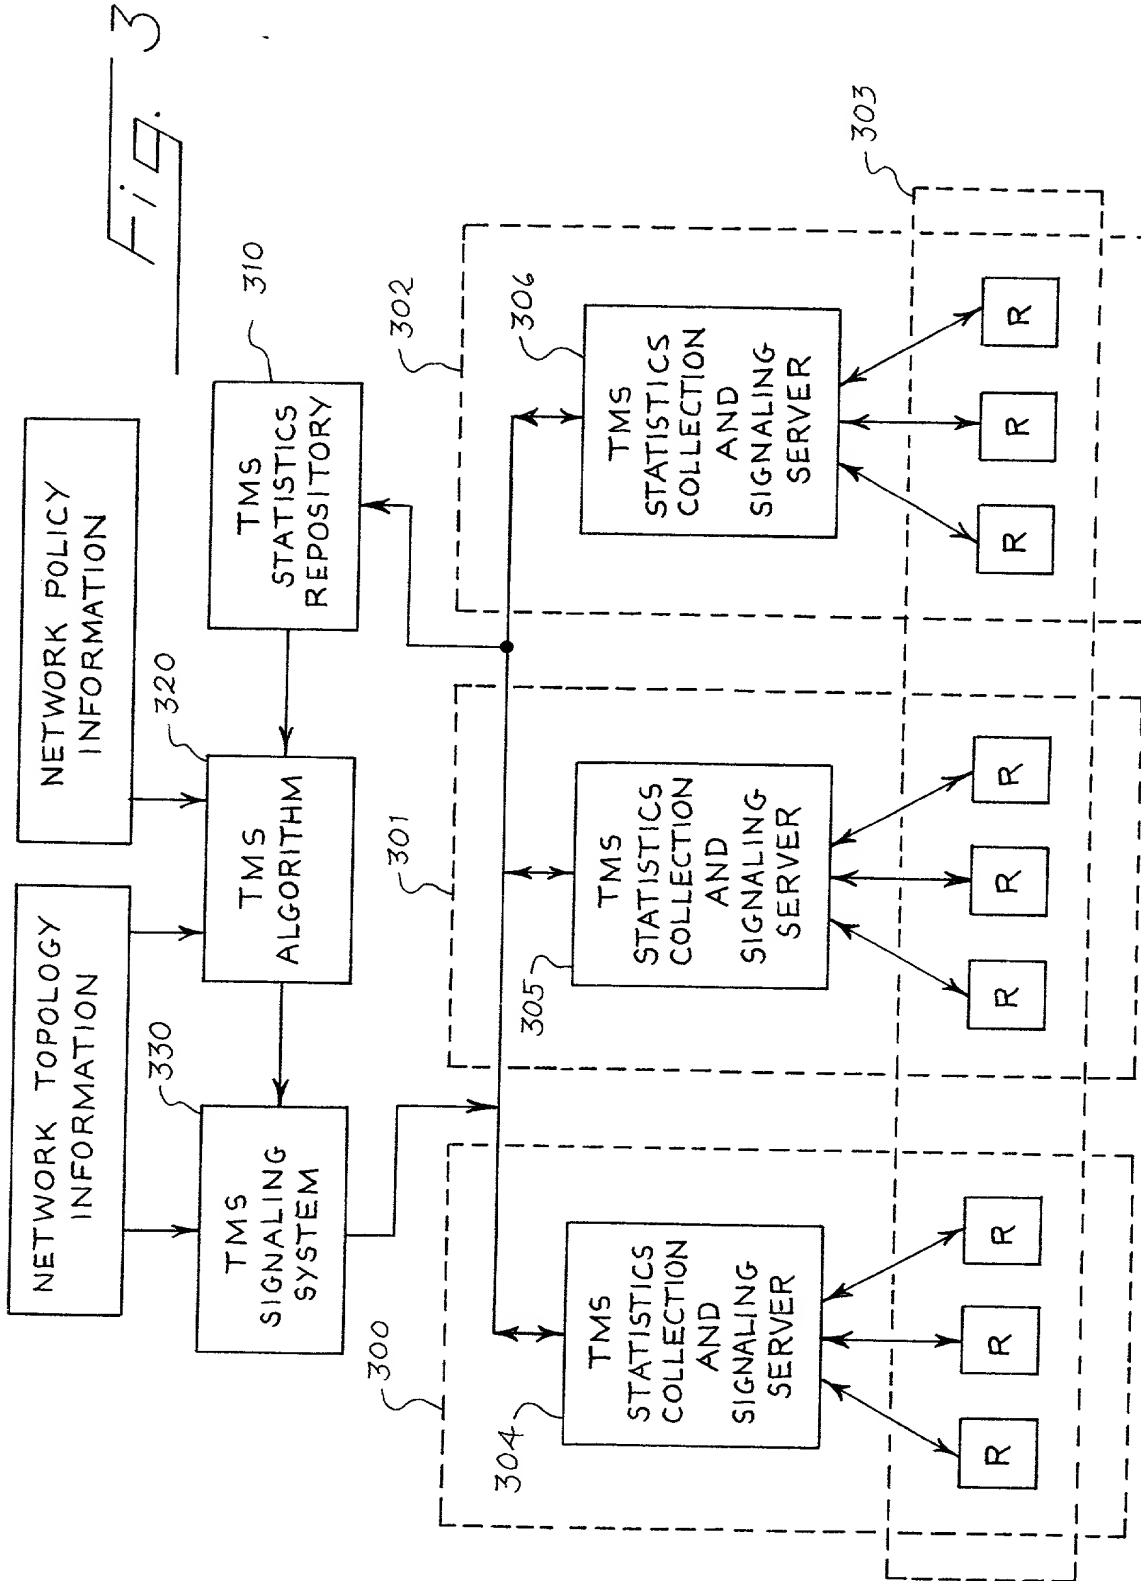

Fig. 1 is a schematic diagram of a network system. At the top center is a rounded rectangular box labeled "TRAFFIC MANAGEMENT SYSTEM" with reference numeral 120. Below this box are six circular nodes, each labeled with reference numeral 110. The nodes are arranged in a roughly hexagonal pattern. Bidirectional arrows connect the Traffic Management System to each of the six nodes. Additionally, bidirectional arrows connect the nodes to each other, forming a mesh network. On the left side of the diagram, the text "NODE AND CONTROL INFORMATION" is written. A curved arrow points from this text towards the nodes. A reference numeral 100 is placed near the top right of the node network.
